

Vendor Payment Analytics Dashboard

Project Overview

This is a self-initiated Microsoft Excel project built using synthetic vendor payment data to strengthen practical finance and accounting reporting skills. The project simulates the responsibilities of an accounts professional responsible for tracking vendor invoices, outstanding payments and monthly expenses.

Business Scenario

The dashboard analyzes 103 vendor invoices across 12 vendors and four property units from January to June 2026. It provides management with insights into vendor spending, payment performance and outstanding liabilities.

Tools & Techniques Used

- Microsoft Excel
- Pivot Tables & Pivot Charts
- XLOOKUP, VLOOKUP & INDEX/MATCH
- SUMPRODUCT & SUMIFS
- Conditional Formatting
- Data Validation (Month Selector)
- Interactive Dashboard Design

Dashboard Features

- Dynamic Month Filter
- Total Spend KPI
- Outstanding Amount KPI
- Overdue Invoice Count
- Paid Percentage KPI
- Vendor-wise Spending Analysis
- Category-wise Expense Distribution

Key Learning Outcomes

This project strengthened practical Excel skills in dashboard development, financial reporting, lookup functions, Pivot Tables, formula-based KPI calculations and business reporting. The project uses fictional data solely for learning and portfolio purposes.
